

GLADIATOR

UK impact

Gladiator leverages the latest technologies to deliver multi-layered complex training in a safe, secure and resilient synthetic environment for Maritime, Land and Air Forces. It represents a step-change in capability for the UK, allowing crews and ground forces from all three services, along with the UK's allies and partners, to train in a secure and seamless virtual environment. The newly developed sovereign capability has created over 50 highly skilled jobs in the UK.
